

Share of bioenergy (%) in energy consumption in Finland

	2005	2020
WOOD	23	26
- forest chips	1.8	6.3–7.6
PEAT	3.5	5
OTHER	0.6	3
- agricultural biomass	0	2
- recovered fuels	0	1
TOTAL	27	34

- The figures for 2020 are targets which presuppose that the energy consumption will grow. If peat is not considered as a biofuel, Finland's internationally agreed share of bioenergy decreases respectively.
